## CMH Cancer Care

### Leading expertise

Our doctors are board-certified cancer specialists from one of the nation's top cancer centers and are experienced in treating many, various forms of cancer and blood disorders, including complex and rare cancers. Our nurses have advanced training and certification in oncology.

### Support services

Our support team includes a nurse navigator, licensed dietitians, exercise and rehab therapists, pharmacists, licensed social workers, and chaplains. They help address your dietary needs, financial concerns and provide emotional support, medication management and other needed resources.

### Collaborative, customized, compassionate care

Our physicians and nurses work together in collaborative teams with other specialists from various disciplines. Our medical team provides cutting-edge treatment customized to you and delivered with compassion.

### Innovative treatments and clinical trials

Our specialists are continually researching new and better ways to prevent, detect and treat cancer, and we provide the latest therapies and technologies. Access to Massey's cutting-edge clinical trials offers you added and advanced treatment options conveniently close to home.

### The area's only radiation therapy

We offer the only radiation treatment facility in Southern Virginia. With both medical and radiation oncology services, we provide the most cancer treatment options in the region and conveniently deliver this first-rate cancer care.

### Advanced technology

With Rapid Arc®, a highly focused treatment beam precisely targets the tumor, sparing surrounding healthy tissue and significantly shortening the treatment time compared to conventional radiation therapy.

## About Massey

VCU Massey Cancer Center is working toward a future without cancer. It is among the top four percent of cancer centers in the country to be designated by the National Cancer Institute to lead and shape America's cancer research efforts. Working with all kinds of cancers, Massey conducts every form of cancer research; provides state-of-the-art cancer treatments and cutting-edge clinical trials; serves as a vital resource for oncology education, teaching and training; and promotes cancer prevention.

Our collaborative team provides cutting-edge treatment customized to you and delivered with compassion.
