Virginia Opioid Addiction ECHO* Clinic

November 30th, 2018

*ECHO: Extension of Community Healthcare Outcomes
Helpful Reminders

• Rename your ZOOM screen: Please rename your screen with your full name
  • For attendance, please type your full name and organization into the chat box

• All participants are Muted during the call, Please Unmute yourself before speaking. If you have a question, use the ‘hand-raised’ future in ZOOM or type your question in the Chat box.

• Speak to the Camera, avoid distractions and for ZOOM issues (such as echoing, audio level etc.), use the chat function to speak with the clinic IT team (Vlad)
VCU Opioid Addiction ECHO Clinics

• Bi-Weekly 1.5 hour tele-ECHO Clinics
• Every tele-ECHO clinic includes a 30 minute didactic presentation followed by case discussions
  • Didactic presentations are developed and delivered by inter-professional experts in substance use disorder
• Website Link: www.vcuhealth.org/echo
## Hub Introductions

| VCU Team | 
|----------------|----------------|
| Clinical Director | Mishka Terplan, MD, MPH, FACOG, FASAM |
| Administrative Medical Director ECHO Hub and Principal Investigator | Vimal Mishra, MD, MMCi |
| Clinical Expert | Lori Keyser-Marcus, PhD |
| Didactic Presenter | Ke’Shawn Harper, MIS |
| Program Manager | Bhakti Dave, MPH |
| Practice Administrator | David Collins, MHA |
| IT Support | Vladimir Lavrentyev, MBA |

III. Closing and questions

Let's get started!
Didactic Presentation
Addiction and Recovery Treatment Services (ARTS) and the preferred Office-Based Opioid Treatment (OBOT) Program

Ke’Shawn Harper MIS, GCPAP, QMHP-A
ARTS Program Lead/Behavioral Health Senior Program Specialist
Virginia Department of Medical Assistance Services
Transforming the Delivery System of Medicaid SUD Services

All ARTS Services are Covered by Managed Care Plans
A fully integrated Physical and Behavioral Health Continuum of Care

Magellan will continue to cover community-based substance use disorder treatment services for fee-for-service members

Implemented April 1, 2017
Addiction and Recovery Treatment Services (ARTS)
Preferred Office-Based Opioid Treatment (OBOT) Program
Medication Assisted Treatment

Definition and Evidence

- Medications (buprenorphine and methadone) combined with counseling and behavioral therapies for the treatment of substance use disorders
- MAT for opioid use disorder leads to successful recovery rates of 40-60%, compared to 5-20% with abstinence-only models
- MAT can be provided by:
  - Opioid Treatment Providers (OTPs) – Methadone clinics at CSBs and private providers licensed by DBHDS
  - Preferred Office-Based Opioid Treatment (OBOT) providers – primary care clinics, FQHCs, RHCs, outpatient psychiatry clinics; no DBHDS license required
  - MDs, DOs, NPs, PAs must complete waiver training course and obtain buprenorphine waiver from SAMHSA to prescribe buprenorphine for opioid use disorder
Preferred OBOT Providers Recognized by DMAS and Credentialed by Health Plans

Care Team Requirements

- Buprenorphine-waivered practitioner may practice in variety of settings such as FQHCs, CSBs, primary care clinics, outpatient clinics, psychiatry practices
- On site credentialed addiction treatment professional (licensed psychiatrist, licensed clinical psychologist, licensed clinical social worker, licensed professional counselor, licensed psychiatric clinical nurse specialist, a licensed psychiatric nurse practitioner, a licensed marriage and family therapist, licensed substance abuse treatment practitioner) providing counseling to patients receiving MAT

MAT Requirements

- Buprenorphine monoproduct prescribed according to the Board of Medication regulations: when a patient is pregnant, when converting a patient from methadone or buprenorphine monoproduct to buprenorphine containing naloxone for a period not to exceed 7 days, or in formulations other than tablet form for indications approved by the FDA.
- Maximum daily buprenorphine/naloxone dose 16 mg unless documentation of ongoing compelling clinical rationale for higher dose up to maximum of 24 mg.
Preferred OBOT Providers Recognized by DMAS and Credentialed by Health Plans

Risk Management and Adherence Monitoring Requirements

- Random urine drug screens, a minimum of 8 times per year for all patients.
- Virginia Prescription Monitoring Program checked at least quarterly for all patients.
- Opioid overdose prevention education including the prescribing of naloxone.
- Patients seen at least weekly by buprenorphine-waivered practitioner or credentialed addiction treatment professional when initiating treatment. Patient must have been seen for at least 3 months with documented clinical stability before spacing out to a minimum of monthly visits.
- Periodic utilization of unused medication and opened medication wrapper counts when indicated.

Benefits

- No Prior Authorizations required for buprenorphine products.
- Buprenorphine-waivered practitioner in the OBOT can bill all Medicaid health plans for substance use care coordination code (monthly per member payment) for members with moderate to severe opioid use disorder receiving MAT.
- Can bill for Certified Peer Recovery Support specialists.
- Can bill higher rates for individual and group opioid counseling.
- Buprenorphine waivered residents can complete structured moonlighting experiences under the supervision of a credentialed attending physician.
# MAT Payment Model for OBOTs

## Service Description
- Buprenorphine in Office-Based Opioid Treatment (OBOTs)

## Setting
- Primary Care and other Physician Offices, FQHCs, CSBs, etc.

## Physician Visit
- H0014 MAT Induction Day One Practitioner Induction (H0014)
  - Per encounter. Limit of 3 induction encounters (H0014) per calendar year per provider.
  - Additional practitioner visits use most appropriate E&M code.
  - CPT E/M Code 99211-99215: Established Patient

## Opiate Counseling
- H0004 / H0005 Opioid Counseling
  - Assessment of psychosocial needs
  - Supportive individual and/or group counseling
  - Linkages to existing family support systems
  - Referrals to community-based services
  - Care coordination, medical/prescription monitoring, and coordination of on-site and off-site treatment services

## Psychotherapy – Mental Health
- Appropriate CPT Psychotherapy Codes

## Medication
- Patient given Rx; billed by Pharmacy
Psychotherapy and Counseling

• The licensed behavioral health provider, if billing independently from the buprenorphine waivered practitioner, must submit claims coinciding with the buprenorphine waivered practitioner.

• Supports that the member is receiving the required psychotherapy and substance use counseling services along with the practitioner services.
What is Substance Use Care Coordination?

• Includes activities to ensure that necessary services, including mental health services, are integrated into primary care and specialty medical settings through interdisciplinary care planning and monitoring member progress.

• Involves tracking member outcomes and reporting back to the buprenorphine-waivered practitioner and behavioral health professionals.

• Requires interdisciplinary treatment team meetings between buprenorphine-waivered practitioners and licensed behavioral health professionals to develop and monitor the Interdisciplinary Plan of Care (IPOC).

• Connects members with community resources to facilitate referrals and respond to social service needs, as well as linking members with peer supports and tracking and supporting members when they obtain medical, behavioral health, or social services outside the practice.
Substance Use Care Coordination
Service Limits

Only OTPs and Preferred OBOTs can bill for Substance Use Care Coordination.

The initial and final months of treatment, Substance Use Care Coordination may be billed prior to the initial IPOC being completed, as long as the required activities noted above are provided and documented in the member’s medical record for the billing month. The first IPOC must be finalized in the member’s medical record within 30 calendar days from the ISP assessment date.

Preferred OBOTs cannot bill for Substance Use Care Coordination if a member is in an ARTS Intensive Outpatient (ASAM Level 2.1), Partial Hospitalization (ASAM Level 2.5), Residential (ASAM Level 3.3, 3.5, 3.7) or Inpatient/Acute Care (ASAM Level 4.0) setting.

- Preferred OBOTs can bill for Substance Use Care Coordination if a member is also receiving Group Home (ASAM Level 3.1) services.
- Substance Use Care Coordination (G9012) cannot be provided simultaneously with Substance Use Case Management (H0006).
How to Implement Substance Use Care Coordination in the Preferred OBOT Practice?

<table>
<thead>
<tr>
<th>Have a designated staff member who performs the following Substance Use Care Coordination functions:</th>
<th>Meet face-to-face and utilize telephonic/collateral contacts with the member and significant others to facilitate recovery.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Act as the primary point of contact for the member and the interdisciplinary team in the Preferred OBOT or OTP setting.</td>
</tr>
<tr>
<td></td>
<td>Ensure that members have access (e.g., a telephone number, e-mail address) to their Substance Use Care Coordinator.</td>
</tr>
<tr>
<td></td>
<td>Engage members in Substance Use Care Coordination activities as identified in the ISP for OTP settings and the IPOC in Preferred OBOT settings.</td>
</tr>
<tr>
<td></td>
<td>Ensure that members have viable access to emergency services.</td>
</tr>
<tr>
<td></td>
<td>Communicate with the member about their ongoing or newly identified needs on at least a monthly basis (or a frequency as requested by the member), to include a phone call or face-to-face meeting, depending on the member’s needs and preferences.</td>
</tr>
<tr>
<td></td>
<td>Notify members who their assigned care coordination contact is and if there needs to be a change, what is the plan for coverage.</td>
</tr>
<tr>
<td></td>
<td>When possible, ensure continuity of care when care coordinator changes are made whether initiated by the member or by the Preferred OBOT or OTP.</td>
</tr>
</tbody>
</table>
What is Required for Billing Substance Use Care Coordination Each Month?

The Substance Use Care Coordinator must execute the following responsibilities at a minimum to support the monthly billing of G9012:

- Participate in interdisciplinary treatment team meetings for care planning at least once every 30 days for each member;
- Include the activities provided on previous slide;
- Monitor the provision of services, including outcomes, assessing appropriate changes or additions to services, and facilitating referrals for the member;
- Ensure the ISP and the IPOCs are developed and updated as necessary;
- Ensure that appropriate mechanisms are in place to receive member input, complaints and grievances, and secure communication among relevant parties;
- Solicit and help support the member’s wishes (e.g., health care decisions, prioritization of needs and implementation of strategies, etc.); and
- Provide education as needed to support informed decisions.
## Rate Structure for Preferred OBOTs: New Codes

Case Presentation #1

Dr. Sara Woodhouse

Patient 1

- **Demographics:** Female, Mid-20’s
- **Medication:** Suboxone 12mg/day and on variety of meds for bipolar disorder
- **Surgery:** will have gallbladder removed, planning on doing it laparoscopically
  - She is very worried about the pain and would like to be able to take opiates for pain post op.
- **Question:** Best management of suboxone pre and post procedure?
  - I'm interested in the case that is made for using local and regional blocks and maximizing non-opiate meds for pain along with suboxone.

Patient 2

- **Demographics:** Female
- **Medication:** Suboxone 12mg/day for last 7-8 months
  - She has three months to taper and dose is 12 mg.
- **Question:** Patient is interested in tapering so that she can be accepted in an SA treatment program where they don't allow suboxone.
  - Any suggestions about how often to decrease dose and by how much at a time?
Case Studies and Feedback

Virginia Opioid Addiction ECHO

Welcome to the Virginia Opioid Addiction Extension for Community Health Outcomes or ECHO, a virtual network of health care experts and providers tackling the opioid crisis across Virginia. Register now for a TeleECHO Clinic!

Network, Participate and Present

- Engage in a collaborative community with your peers.
- Listen, learn, and discuss didactic and case presentations in real-time.
- Take the opportunity to submit your de-identified study for feedback from a team of addiction specialists.
- Provide valuable feedback & claim CME credit if you participate in live clinic sessions.

Benefits

- Improved patient outcomes.
- Continuing Medical Education Credits: This activity has been approved for AMA PRA Category 1 Credit™.
- Virtual networking opportunities using two-way video conferencing.
- No cost to participate.
- If unable to attend a live clinic session, learn how to access the CME website to view the recording and claim credit.

How to Receive CME Credit

1. Watch video under Curriculum & Calendar.
2. While in CME website, under Content and Tests tab, click "Test" to sign in and take quiz.
3. Once signed in, click the "My CME" or "My CE" button.
4. Click on the appropriate option to view that information.

- Evaluations and Certificates – This option allows you to view evaluations that need to be completed for existing activities you have attended and also allows you to view, print or email certificates for activities you have already completed an evaluation for in CloudCME. This is where you will claim credit, fill out evaluations, and download your certificates.

Please contact VCU Health CME directly with any problems or questions at (804) 828-3640 or cmeinfo@vcuhealth.org

From this screen you can access the following additional options:
- Profile – Allows you to view, edit and update your CloudCME profile. Your profile in CloudCME determines your credit eligibility and ensures your institution has the correct information for reporting and accreditation purposes.
- Transcript – Allows you to view, print and email your transcript. You can also append certificates and/or transcripts from a different organization to your CloudCME transcript.
