VCU Health Outpatient Facility Construction

Updates: 8/6/2018

Utility work and construction at and around the VCU Health Outpatient Facility site will affect traffic patterns on the MCV Campus over the next several months. Please take note of the construction activities below and plan your travel through the MCV Campus accordingly so you arrive safely and on time.

UPDATE: Leigh Street utility work

- The City of Richmond Department of Public Utilities has closed 10th Street, on the North side of Leigh Street, to conduct some additional waterline work. DPU is actively working to complete this as soon as possible.
- The City of Richmond Department of Public Utilities continues their work on Leigh Street at the intersection of 10th Street and 11th Street.
- Dominion has begun utility work from 9th Street through the 10th Street intersection. Eastbound Leigh Street will be reduced to one lane. To accommodate this change, all traffic will be routed through the turning lane at the intersection of 10th Street. Drivers should be aware of potential delays as cars turning North/South and traveling East will be sharing the same lane.

REMINDER: 11th Street lane reduction

- 11th Street, from the construction gate to the intersection at Leigh Street, has been reduced to one lane.
- “No Turn on Red” signs have been installed at the intersection of 11th and Leigh streets.

REMINDER: 10th Street utility work

- Street parking will remain closed and bus traffic will continue to be rerouted through the duration of the project.

REMINDER: VCU Health Outpatient Facility construction

- Excavation and construction begins at the Outpatient Facility site. The sidewalks on 10th and 11th Streets will be closed to pedestrians throughout the duration of construction. For your safety, please follow the detours in this area.

We recognize these on-going changes to traffic patterns on the MCV Campus will be inconvenient to you. As we continue to implement exciting changes throughout our health system, we thank you in advance for your cooperation and understanding. Together we are designing and building the future of health care.
